

DO YOU HAVE A CAT WITH KIDNEY DISEASE?

If you answered YES, you may be feeling upset, confused, and overwhelmed.

DON'T DESPAIR!

There is **free help and support** based on 20+ years of research (and an abundance of personal experience) available at:

[Tanya's Comprehensive Guide to Feline Chronic Kidney Disease](#)

www.felinecrf.org

This site covers the following and more:

Where to begin after diagnosis and key issues of the disease including: <i>What do all those test numbers mean?</i>	Fluid therapy – tips and tricks on how to give subcutaneous fluids at home
Common side-effects of kidney disease including other related diseases	How to obtain supplies you need at a reasonable price
Evidence-based treatment options, as well as some not so common treatments – (and of course, ALWAYS consult your vet first!)	Tips on coping with the disease and how to say goodbye when the time comes
Signs to look for in your cat to address common possible side-effects such as dehydration, nausea, vomiting, high blood pressure, anemia and more...	A wealth of external resources from how-to videos to scientific papers, extensive research from multiple sources, and even research participation opportunities
Dietary issues – including extensive food data tables designed to help you find suitable foods through each stage of the journey	A free forum for you to get invaluable real-time support from others who have been or are going through their own journey with a cat with kidney disease

While this site was started and is run by a non-veterinarian, its value has been recognized by the veterinary community regularly since first being featured in *Your Cat Magazine* in December, 2000.

Most recently the site received two awards from the Cat Writers' Association in 2020.

All recommendations and awards can be viewed at:

www.felinecrf.org

TREATING YOUR CAT WITHOUT VETERINARY ADVICE CAN BE EXTREMELY DANGEROUS. ALWAYS CONSULT YOUR VETERINARIAN FIRST. THIS SITE IS FOR EDUCATIONAL PURPOSES ONLY.
